C11

28. (Twice Amended) The nucleic acid as claimed in claim 47, having homology with the zinc finger domains of the PLAG1 (pleomorphic adenoma gene 1) gene the nucleotide sequence of which is depicted in figure 4A (SEQ ID NO: 116), or a complementary strand thereof, including modified, degenerate or elongated versions of both strands.

F11

29. (Twice Amended) The nucleic acid as claimed in claim 47, comprising the nucleotide sequence of the PLAG1 gene as depicted in figure 4A (SEQ ID NO: 116), or a complementary strand thereof, including modified, degenerate or elongated versions of both strands.

IN THE DRAWINGS:

Copies of Fig. 4, 8, 9, and 10 have been supplied with the amendment (with the addition of SEQ ID NO:) indicated in red. These corrections will be made formally when formal figures are filed at a later date.
